## INTERNATIONAL TRAINING-CUM-WORKSHOP

on

### "COMBATING WHEAT RUST"

14-16 FEBRUARY 2012

The Indian green revolution has not only saved India from the verge of mass famine but also turned it from being an importer to a major exporter of food grains. Wheat and rice contributed to this immensely. While the wheat productivity jumped leaps and bounds, the wheat rust also co-evolved emerging as a major threat to wheat production.

The Barwale Foundation is conducting an international training-cum-workshop, the first of its kind, which aims at addressing the wheat rusts, their surveillance, evolution and virulence genes on one hand, while on the other, elucidating the combat against wheat rusts through conventional and molecular resistance breeding.

Resource persons include a galaxy of renowned scientists of international and national repute from University of Nebraska, University of Sydney, Directorate of Wheat Research, Punjab Agricultural University, Mahyco, etc. These scientists will add new dimensions to understanding and combating the rust pathogen.

The participants from SAARC countries will get hands on experience with DNA based wheat resistance gene detection and the field demonstration of rust resistant lines. The workshop will serve as a knowledge sharing and gaining platform through interactions and networking.

Duration	Course Fee	Deadline
14-16 February 2012	INR 10,000/= (per person)** <small>** does not include travel, lodging and boarding</small>	20 <sup>th</sup> January 2012

**Venue:**

Barwale Foundation, Knowledge & Study Centre,  
Plot No.BT-4, Additional MIDC Area, Phase II, Jalna-Aurangabad Road, Jalna-431 201. Maharashtra, India.

Interested candidates may please send their applications with recent photograph on or before **20<sup>th</sup> January 2012** along with payment of **INR 10,000/-** (Ten Thousand) through Demand Draft or at par value cheque in favor of "**Barwale Foundation**" payable at **Hyderabad** to the following address:
